The enterprise from North-West Poland is operating in the field of the heating industry and is manufacturing heating elements for machines and devices for over 50 years. Thanks to the experience, qualified staff and the highest quality of manufactured products the company became the leader among the producers of heating elements in the region. The company produces heating elements (tubular, band, strip, coiled, galvanic, etc.), temperature sensors, air heaters, fasteners, control equipment and accessories, ceramic terminal blocks, etc. Produced heating elements can be used in different industrial branches - manufacturing and fixing of household equipment, refrigerating engineering, electroplating, processing of plastics, ventilation and air-conditioning, etc. The company is looking for distributors and is offering its services as a subcontractor. They have a modern technology park, co-financed by the European Union, at its disposal.
