

Brokerage Event at the All Energy 2010 Exhibition and Conference Aberdeen Exhibition and Conference Centre 20 May 2010

The [All Energy 2010](http://www.all-energy.co.uk) Exhibition and Conference is just over two months away in Aberdeen (<http://www.all-energy.co.uk>). Enterprise Europe are delighted to inform you that our network colleagues will be holding an International Brokerage Event in line with All Energy at the Aberdeen Exhibition and Conference Centre on 20 May 2010.

This will present a great opportunity for organisations attending the All Energy 2010 Exhibition and Conference. The event is free to attend and is an ideal opportunity for those attending the Exhibition and Conference (and others) to make the most of business development opportunities through quick and focused, pre-booked business meetings.

Companies book 30-minute meetings in advance of the brokerage event through an online catalogue and booking system. This speed-dating type approach gives enough time to scope out potential opportunities and see if they would like to take things further. The event has been structured to enable companies to make the most of their time and potential opportunities. It's an ideal platform for delegates to find new partners to license technology in or out, new R&D, business services or products to offer and/or source, or just to do business together.

The website for further details and registrations is now live and can be accessed here: <http://www.connect121.biz/>. The team at Enterprise Europe Yorkshire will be there and are happy to support companies through the registration and profile preparation process.

This event comes on the back of a highly successful Life Sciences Partnering event in Edinburgh in February, where 58 companies (including those from Israel, Switzerland, Iceland and Belgium) took part with over 170 meetings taking place and around 80% of the delegates saying their meeting will lead to collaboration in the future. We hope that we get even better results at All Energy.
